

SELFGUARD Generator Auto Start Auto Stop Unit with Wireless Remote (GSU-2W) is an auto-start, auto-stop unit with wireless remote for all types of self-start generators.

In **Auto mode**, the generator starts automatically after the absence of the main supply and stops automatically after the presence of the main supply.

In **Manual mode**, the generator can be started with the C(Start) button present on the wireless remote, and the generator can be stopped by pressing the D(Stop) button on the wireless remote anytime in the absence of the main supply. The generator will also stop automatically after the presence of the main supply if not stopped with the D(Stop) button.

| Functions |
|----------------------------|
| Remote Start – Remote Stop |
| Remote Start – Auto Stop |
| Auto Start – Auto Stop |

In either **Auto or Manual mode**, the unit stops the generator automatically when the main supply is present.

The **Wireless remote** provided with the main unit can be operated from up to 300 feet away from the generator. With the wireless remote, you can remote start(C button) and remote stop(D button) the generator, and the Auto(A button) and Manual(B button) modes can also be changed remotely.

Safety Feature: This unit will not bypass any Safety of the Generator.
