

**SELFGUARD Generator Auto Stop Unit with Remote (MSU-2)** is a remote-start, auto-stop unit with remote for all types of self-start generators.

The generator can be started with the green/start button present on the main unit or the remote unit, and the generator can be stopped by pressing the red/stop button on the main unit or remote unit anytime in the absence of the main supply. The generator will also stop automatically after the presence of the main supply if not stopped with the red/stop button.

The remote unit provided with the main unit can be operated with a 3-core wire having a thickness of 0.5mm only from an unlimited distance. With the remote unit, you can remote start and remote stop the generator.

**Safety Feature:** This unit will not bypass any Safety of the Generator.

This PDF provides information on the **Item Code: MSU-2 (For Procom)**.

This model is compatible with the Generators that have the Procom Controllers installed:
